💼 Professional Experience

Intern in Software Development, *mCognito Labs*   07/2020 - 01/2021
                                                                                Ireland
- At mCognito Labs, I developed my understanding of coding specifically Java, JavaScript, HTML/CSS with a focus on web and mobile app development for eLearning.
- My duties included working with others to develop software development and independently reviewing code.
- This Internship resulted in me developing several key skills which are: Consistency, Working with a team, and Time management.

🗀 Projects

Ordeo 🔗
- Ordeo is an inventory ordering system that uses React/Redux/Django Rest/Axios.
- This project has 4 main functions: Authentication, Product Management, Product Purchasing, and Order Tracking.
- In making this project I learnt about REST Api's, React Development and Tech Stacks.

Remback 🔗
- Remback is an image matting AI that uses React/Redux/Django Rest/Axios to remove backgrounds.
- The AI used is ZHKKKE's MODNet.
- The image is processed on a Django REST backend and returned via an API Response which is then processed on the React Frontend.
- This project taught me how to use AI in a tech stack.
